PROJECTS

The Bookshelf

08/2021

<https://github.com/holuwateemeeleyin/book-lending-app>

Udacity assessment project

- The Bookshelf is a web app which is developed with Reactjs. The Bookshelf project helps in categorising books that user wants to read, has read or currently reading. The user can also search and add books to the Bookshelf.

Visitor Management System

09/2021

<https://github.com/holuwateemeeleyin/visitor-management-system>

A visitor record keeping project

- The project is a visitor management system which is developed for keeping track of guests entering the organisation by taking their records. The admin would see guests that are currently inside the building or outside. The project is a web app, which is developed with Reactjs as the front-end and Nodejs as the server side, with MongoDB atlas as the database.
